

Utah teens to join climb

DENVER (AP) — Two Utah teenagers will join a Mount Everest expedition this October as part of a team of "ordinary people" climbing without oxygen or porters above 20,000 feet on the world's highest mountain.

Brett Heimburger, 17, and his brother Matthew, 14, both of Heber City, Utah, will climb with a team headed by their father, John Heimburger, 42, Denver, a commercial pilot for Frontier Airlines. The elder Heimburger said the expedition will take only a month and the party will not attempt to reach the summit. The group leaves Denver next Oct. 24 and will return Nov. 22, he said.

Four men, three women, and three teenagers comprise the 1984 Frontier Nepal-Everest Expedition, he said, adding that eight of the expedition members have been chosen so far.

"We won't use oxygen to climb above 20,000 feet, although several have never been to the top of any mountain before," he said. "These are ordinary people trying the extraordinary, the unknown."
